 20, was taboed in the county  
 was defeated by 5394.

**BREA MAN WOULD SAVE U.S. BILLIONS**

R. A. Prindle, one of Brea's oldest oil well drillers, has a plan whereby the United States Government could save \$25,000,000,000 with an additional \$1,000,000,000 annually in interest.

Mr. Prindle's plan is for every one who has bought Liberty Bonds to return these bonds to the Government for cancellation as paid in full. He feels that every purchaser who has bought bonds has bought proportionately what he could afford and that to make this a free donation to the Government will expedite the paying off of the war debt and make it much easier than to pay this debt in taxes with the enormous amount of interest that will accrue, leaving this national debt for the coming generation to assume.

Government financial needs for many years are almost certain to run above \$4,000,000,000 annually, treasury experts estimate, and most of the money will be raised by taxation. Consequently students of government finances think the taxes imposed last year and paid in June probably will not be lightened materially by the advent of peace.

Secretary McAdoo has warned that taxes necessarily would be high for many years to pay off war debts, and that additional government loans would be required.

Roughly, treasury officials and congressional leaders in charge of revenue legislation figure this way: Ordinary government expenses, which ran around a billion dollars a year before the war will now amount to at least \$2,000,000,000 annually for many years, and for two or three years after the war may be double that figure. If the \$16,850,000,000 of Liberty Bonds already issued are increased in volume by later loans to \$25,000,000,000, the interest on this sum would amount to about \$1,000,000,000 a year.

In addition, it probably will be the government's policy to establish a sinking fund to pay off the bonds at maturity, and this would require about \$1,250,000,000 a year. These three items would make an aggregate near \$4,250,000,000.

To offset this, there would be nearly a half billion dollars coming in annually from the allies as interest on their loans, which now amount to seven billions and are

**DATE OF MATURITY ADVANCED**

The date of maturity of United States Treasury Certificates of Indebtedness of series 4 D, dated August 6, 1918, has been advanced from December 6, 1918, to November 21, 1918, according to telegram received by Governor James K. Lynch of the Twelfth Federal Reserve District from Secretary of the Treasury William G. McAdoo.

The following notice has been given to holders of these United States Treasury Certificates of Indebtedness: "All United States Treasury Certificates of Indebtedness of series 4 D, dated August 6, 1918, and maturing December 6, 1918, are hereby called for redemption on November 21, 1918, at par and accrued interest pursuant to the provision for such redemption contained in the certificates. On November 21, 1918, interest on all certificates of said series will cease to accrue."

**CIVILIZATION JUSTLY BECOMES UNCIVILIZED**

People of Brea celebrated all over Southern California last Monday, starting at home shortly after five o'clock in the morning when the first report of peace was sounded in this community.

Happy throngs paraded the streets here from an early hour, making noise with every conceivable thing that could be transformed into a noise producer. Genial Ed Peterkin had the Kaiser backed up against the wall of the Sewell block and was charging ten cents for three throws at the tin crown—three throws to everyone who uncrowned the fallen war lord, "Pete" took in something over \$10.00 in this way for the United War Work fund.

Soon after noon the Brea people began to scatter in every direction—to Fullerton, to Anaheim, to the beaches, to Whittier and to Los Angeles. And they kept going and giving vent to enthusiasm and joy as long as physical strength would permit. Many went into Los Angeles Monday night, defying the "flu" and all restrictions, and some did not return until the early hours of Tuesday morning.

It was a gay day every place. Everything was permissible, everything was excusable. It was one day in which civilization was justified in becoming uncivilized.

**FLU ABDICATES AS KAISER GIVES UP JOB**

**PEACE WILL NOT STOP FLOW OF PETROLEUM**

Peace and Petroleum—With the close of the world war in Europe the oil industry of America is destined to move forward with a rapidity that will place it among the great if not the greatest industries in our country.

The industry has made tremendous advances during the past year with all the hindrances of restrictions, privities, high cost of supplies, limited equipment and a cost of operating that eclipsed anything ever experienced since the oil business started over 5 years ago. What the great industry will now achieve under peaceful conditions can only be dreamed.

Now that the great steel rolling mills of the east will cease making weapons and attention turned to the making of pipe and casing the oil industry will not be held up for pipe for the drilling of wells. Drilling tools and supplies that require the best material for their manufacture had been curtailed on account of the need of the men at the front. This material can now be made into drilling equipment and put to digging.

The wild catter and the development of new fields will feel encouraged proceed now that supplies and equipment for the drilling of wells can more readily be secured and depended on. No one now need feel afraid to start a well for fear of not being able to get the material to complete it.

The big operators, Standard, Union, Shell, Associated and others can safely go ahead and map out great development plans and have no fear of being able to carry the work through.

The restrictions on the handling and sale of production, especially of oils, will be removed, creating freedom of the markets that will encourage development and production of grades of petroleum.

The demand for petroleum and petroleum products will increase as the reconstruction period gets under way. great oil burning traffic carriers of sea have to have fuel. The oil engine is just coming into its own, the chemist working in his laboratory is going to find many new and startling properties of petroleum. As a matter of fact it is agreed that the chemistry of petroleum is just in its infancy. Capital heretofore held in check account of the uncertain condition will be invested in oil and an unalloyed era in the industry is dicated.

Well Changes Formation, No. The Amalgamated Oil Company No. 42 on the Anaheim Union V property changed in the form shale to shell at 3452. At

...to Finance Board. Later he sent an address as Qualinga. Notices sent to that address, however, came blank unreturned. In the mean time Braddock did not keep the local board advised of his correct address. And for that he is now classed as a deserter. Joseph Gothard of Hlythe was entrained in place of Braddock.

The twenty men who were entrained from Fullerton were escorted from the Exemption Board Headquarters by the Home Guard, led by the Fullerton Brass Band, and there were large numbers of people at the station to wish the boys a happy journey and safe return.

**PROSPECTS LOOK GOOD ON BASTANCHURY LEASE**

The Union Oil Co., after years of hard work, and the expenditure of a great deal of money in getting the Bastanchury ranch lease up in good condition with the chances looking good for an oil well. At No. 8 the drill is now making hole in brown shale at 3800 feet. No. 6, after being delayed on account of pipe and formation trouble for a number of months is getting down on bottom again, the depth being 4700 feet. A number of good showings were noted on the way down and the final outcome of the well is of particular interest to the people of Fullerton as well as the Union Oil Co.

**GOOD WELL PROMISED**

At La Breda, in the Montebello field, the Union has completed No. 2 and is about to perforate the pipe and put in the tubing. This well has been showing up rather good and the owners expect another well characteristic of the famous new field when this well goes on the pump.

**COLLISION RESULTS IN ONLY SLIGHT INJURIES**

Mrs. Ed. Wagner of Anaheim and Murray Horn of Yorba Linda met in a collision at Eureka avenue and the Yorba Linda boulevard Thursday afternoon. It is reported, which resulted in some damage to the machines, although no one was seriously hurt.

Mrs. Wagner had been visiting her mother, Mrs. M. A. Quigley, and sister, Mrs. J. L. DeWitt, and had started home with her little daughter. Mr. Horn was coming out on the boulevard, it is stated, and the two machines came together. The little girl was thrown out and fell on the fender of Mr. Horn's car. It is reported, but escaped with a few scratches. No one else was hurt.

**PROMISES 'SOME' MUSIC**

O. J. Eckley of Anaheim promises something novel in the way of dancing for a dance to be given in Anaheim on the evening of Wednesday, July 31, this being the first of a series. The music will be furnished by a saxophone orchestra, of which Mr. Eckley will be the leader. Mr. Eckley was formerly a member of a saxophone sextette which gained no little fame over the country, and recently, he has been instructing a number of Anaheim musicians in the use of the instrument. The orchestra will include the usual instruments considered necessary for the produc-

gives you the right to enjoy the consciousness of having helped your country at a critical period. "It is earnestly hoped that you will contribute an equal measure of co-operation in future campaigns. JAMES K. LYNCH, Chairman Liberty Loan General Executive Board and Governor Federal Reserve Bank of San Francisco."

**LOCAL BOYS ARE OVER THERE**

A word from across the seas, "Arrived Safely," which was received by B. S. Bonds of Yorba Linda from his son, Arthur, brings a thrill of joy to many a home in this district for Mr. Bonds was with the 264th Infantry at Camp Lewis, the regiment into which the first enlistment of boys from District No. 2 were placed last September.

Word has been received from time to time the last few weeks telling of the trip to the eastern seaboard, and then silence, so this news of a safe arrival is welcome to all.

**COPA DE ORO HAS ENCOURAGING PROSPECT**

At a depth of 3989 feet the Copade Oro Oil Co. has suspended drilling operations and cemented. Bailings from the well just before the cementing showed a strong gas pressure and an abundance of good substantial oil colors. The management feels jubilant over the condition of the well and is anxious for the cement to set so that the drilling can be resumed. This well now represents two years of work and an expenditure of close to \$100,000.

**GRAHAM-LOFTUS ACTIVE**

For the first time recently Graham-Loftus property of the Union Oil Co. is running a number of strings of tools and work is progressing with no fishing jobs to delay. This property is one of the difficult leases to handle and the drilling of forty wells that have been put down was accomplished with a great deal of hard and persistent work. G-L No. 49 is drilling in the blue shale at 2785. At No. 51 the rotary is making hole in conglomerate at 1650 feet. No. 52 spudded in a few days ago has 600 feet of hole and is drilling in blue shale.

**EMBROIDERY CLUB**

The West Coast Embroidery Club enjoyed a well attended meeting at the home of Mrs. Joe Frisly Friday afternoon, when an hour of sewing and visiting was followed by deft refreshments.

Those present were Mesdames E. Cline, L. C. Stevens, M. Ford, M. Ryan, B. Raymond, H. Yeager, G. Krauss and Grace Hunt of Anaheim.

**FURLOUGH TO SEE NEW ARRIVAL**

"Where did you borrow that telegram" asked the officer of Sgt. L. F. Ridenour when the latter presented a

**WAGE ADVANCE TO BE TOPIC**

C. C. Kinsler and Boyd Smith left the first of the week for Bakersfield to attend the meeting of the Oil Workers' Union executive board, which is holding a conference this week regarding the advance in wages, one dollar per day for all labor in the fields.

Regarding the action for wage advances and the reasons involved the following explanation has been given: "It is expected that the request for the increase will be submitted to the operators by August 15 or there about. If the operators fail to comply, the oil workers will present their case to the government for adjudication.

"Consequent on the cost of living, which has advanced to such an extent that previous wage increases are not sufficient to meet it, there has been an insistent demand from all localities that a new schedule be asked for.

"The operators will also be requested to allow double time for all overtime labor performed. This is on account of the peculiar interpretation placed on the emergency clause in the existing ruling, by many of the employers. Complaint is made that the spirit of the ruling is not being lived up to, and men are required in many instances to work more than eight hours at work that does not constitute an emergency as specified in the findings of the Federal Oil Inspection Board."

Mrs. Kinsler and Mrs. Smith accompanied their husbands.

Mr. and Mrs. Reynolds are to represent the Montebello local.

**DISCONTINUE ISSUING SUGAR CERTIFICATES**

July 20, 1918. TO ALL CITY FOOD ADMINISTRATORS OF ORANGE COUNTY:

This office has just received the following telegram:

"Discontinue issuing sugar certificates on yellow canning slips immediately. Retailers are to continue selling, but must sell from stocks for certificates now on hand.

"Jobbers are now permitted to deliver balance of sugar on certificates issued by the various food administrators."

C. S. CROOKSHANK, Food Administrator of Orange County

BREA, ORANGE COUNTY, CALIFORNIA, FRIDAY, MARCH 1, 1918

No. 37

## HARBOR PROJECT FINDS NEW SNAG

Support harbor proposition with a new opposition—an energetic one. The County Taxpayers League found the project from the out- patriotic and economic rea- now the federal authorities banking fraternity of the have lined up in a way against re has been a general feeling several months that it was useless the Newport harbor bond elec- because the bonds could not be Wednesday afternoon bankers county asked that the of supervisors do not call the n. for voting upon \$500,000 for Newport harbor.

argument of the bankers was the government needs every dollar to carry on the war, is doubtful if the bonds could be voted and that it was their opinion that the election be called. They said that ment has strongly con- d the banks to conserve finan-

through at this time—that all re- sources should be conserved to meet more urgent demands, and that it would not only be impossible to carry the bonds at this time, but practically impossible to sell them if they should be voted. Certainly, if they could be sold at all it would be possible to sell them only at an exorbitant rate of in- terest, or discount.

L. H. Wallace and J. A. Armitage made arguments for going ahead, de- claring that harbor improvement is essentially for government purposes. Ship building sites are needed.

The matter was gone into thor- oughly and discussed at length, and the board of supervisors decided to lay the question over until the meeting of the board on March 19. In the meantime an effort will be made to get the endorsement of the federal authorities for the project.

## Oil Men to Have Big Organization

The Brea delegation which was in attendance at the state meeting of Oil and Gas Well Workers in session in Bakersfield last week, returned home Sunday evening. They report an enthusiastic meeting and much headway made in important direc- tions. The matter of an international or-

## DRAFT BOARDS GRIND STEADILY ON OIL DEVELOPMENT IN IN BREA FIELD

A large number of agricultural claimants from this exemption district were before Dr. C. D. Ball at the hearing at the court house in Santa Ana Monday night and recommendations were made to the district board.

Several workers in the oil fields had their claims referred to Assemblyman Wright, member of the appeal board in charge of industrial claims. They are Clayton M. Hall, Edward N. Bond, La Habra; Wm. H. Ross, Brea; Earl E. Cammack, Whittier; Clyde O. Kelly, La Habra; Frank L. Hamblin, Los Alamitos.

Dependency claims were heard, but closed doors, with recommendations as follows:

Henry Boisseranc, Buena Park, agricultural claim, denied.

Rolle C. Byard, La Habra, dependency denied, industrial referred to Wright.

Benjamin H. Sldnam, Anaheim, dependency claim allowed.

Frederick W. Schmidt, Anaheim, under advisement.

Fred N. Osman, Huntington Beach, dependency claim denied, industrial claim as best the records indicate, under advisement.

## OIL DEVELOPMENT IN IN BREA FIELD

BY ELLWOOD J. MUNGER  
The month of February closes with the activity of the oil operators very strong. In the oil fields of Orange County. The rare about 100 wells drilling in the field, and the number of completions made during the present month are remarkable considering the scarcity of casing and other oil well supplies. February witnessed the daily production of the field increased until it is now close to the 58,000 mark. Only two wells have been abandoned during the month. Casing shipments are beginning to move a little faster in the East and field working conditions are a little better with the cessation of the pipe situation.

Birch No. 14 3314 Feet Deep  
Joseph Royer, field manager for Otis Birch at Brea, is making an excellent showing on No. 14 now drilling. Practically without a delay and in a remarkably short time he has drilled the well to a depth of 3314 feet. The formation has changed from the oil sand discovered a couple of weeks ago to brown shale. It is the intention of the main company to drill this well to 4000 feet and fan the deeper sand reservoir.

pressure are the encouraging features of this deep well.

Union Oil Company Has Big Week  
Aside from a few fishing jobs and pipe trouble on a couple of its wells, the Union Oil Company report a very successful week, with operations on seven different leases and seventeen strings of tools running in the Orange County field.

Standard Will Endeavor to Make Oil Well Out of Coyote 28

The Standard Oil Company is not entirely discouraged over the results obtained in the drilling of Coyote 28, in the east end of the Brea field. This well was drilled to a depth of 4254, put on the beam and pumped water. It is the intention of the company to come back up now and test out some of the upper sands that showed oil when the well was being drilled. A small well will probably be obtained.

## Bob Russell Weds in Ontario Monday

Robert Russell, son of Mr. and Mrs. J. E. Russell, was united in marriage last Monday to Miss Mabel Sachs of Pomona, the wedding taking place in this city. The bride is a sister of the wife of Charles Russell, older brother of the groom. The wedding party, accompanied by the groom's father, left Monday

## ONLY THE VICTORY BREAD ON SALE

Beginning Monday, February 24, all bakery products sold in the United States will be Victory products. Pastries must contain at least 33 1/3 per cent of wheat flour substitutes. These products may be sold on any day of the week and as far as the storekeeper is concerned there will be this no "wheatless" days as contrasted to other days.

There will, however, be the same "wheatless" days for housewives in that no pure wheat flour products may be baked in the homes on Mondays and Wednesdays.

The following paragraph is taken from a bulletin, "Regulations of the United States Food Administration for Retail Grocers," issued by the authority and under the direction of Ralph E. Morritt, federal food administrator for California:

"Pastry made out of 66 2/3 per cent of substitute flour must be sold on every day in the week after Feb. 24. Up to that date pastry manufactured from straight white flour cannot be sold on wheatless days, to-wit: Mondays and Wednesdays."

AUTOS SNAG IN BREA CANYON

There was war here day before yesterday, and it's still cloudy and the air is full of fog.

Our Morals is excellent. The signs of war produce no unbusiness and all the boys are looking for a scrap. Several of them have knocked down their cockney already. A cockney on the boat who said America, Japan and China are the only yellow nations, was "out" for two hours.

I am still in perfect health, and enjoying every hour. You will hear from me regularly if the boats keep Ned Bishop.

July 23, 1918.

Dearest Mother and Father:

Just a few lines to let you know that I am well, and hope you can say the same when I hear from you. I'm somewhere in France. Don't know just where. Had a pretty good trip across the Atlantic, was only sick a couple of days.

France is a very pretty country. The people are very nice to the American soldiers. They raise lots of flowers and have some of the nicest gardens I have seen. Every body has an acre or two out in garden over here. The main product is grain. There isn't any plumbing work in the houses. They draw their water from the wells with a chain and windlass. The houses are built out of cement and rocks with stone roofs. The stones on the roofs are flat and they are put on like shingles, of course the roofs haven't so much fall. The people and cows and chickens and horses all live in the same house. They drive their horses in single file, strung out four to a long with shafts in their wagons. The most used vehicle is a cart two wheels high above the horse. Looks pretty old-fashioned but they don't mind that.

I went to church this morning. It was a Catholic church and the minister spoke in French. I couldn't understand him but was glad I went any way. The church is very pretty inside. They have some of the finest head work on their tomb stones I have ever seen.

Loveingly,  
Everett Walker.

Motor To Beach—  
Mr. and Mrs. R. F. Jones and family, of the Santa Fe, with Miss Olive Dale as their guest motored to Long Beach, Sunday.

There will be no Grand and to these would occupy the parade, which will start from the nearly 10 o'clock if possible. It will be length and there will be three calliopes and create music for through.

**CORRECT ADDRESSES LETTERS**

American E. F. is dress letters to to make it just 'A. E. F.' to the Australian E. F. If you want your soldier over there is intended in the space of time please write E. F. at the bottom after his name and spell out "American" to be sent to the E. F. and be delayed your American soldier reaches him at all.

This is the advice of master Overshiner.

While it isn't exactly clerks' business to wait and see that they are a

**Barnum and Bailey Show Will Present Gaily Exhibits in This Vicinity**

There is to be a real circus day this year—a Barnum & Bailey circus day. Advance guards of the Greatest Show on Earth announce that this season's route carries it close enough to be visited by everybody in this vicinity. Thirty acres of tents will be set, and the big show will be exhibited in Los Angeles on September 16, 17, and 18.

A wonderful new program is promised, and it is claimed that this season the monster entertainment has more and better things to show than ever before. Starting with a magnificent pageant entitled, "Aladdin and His Wonderful Lamp," the circus will occupy three hours or more with events in air, on platform, and rings, and in the huge hippodrome surrounding. Not one moment will be lost in all of the spaces of the vast enclosure.

The opening feature is the first attempt at Chinese pageantry in the history of American circuses, and it has been described as the most gorgeous presentation ever attempted. The story of the gentle slave of the magic lamp is well known to need description here. However, it may be well to call attention to the possibilities for display in coloring and magnificent settings in the Chinese locale, and to the fact that Barnum & Bailey have spent \$1,000,000 to reproduce all of its glorious possibilities.

The circus program, which follows the pageant, is made up almost entirely of names and acts new to the American public, the cream of all continental circuses having rushed to the big show's European agents for booking on account of the closing of most of the big foreign circuses. There is a complete Chinese circus, replete with thrilling aerial and acrobatic feats; the famous Hanneford family, champion riders of Europe, will display their wonderful skill; Signor Bagoughi, the dwarf bareback rider, described as the equestrian comic of the century, will thrill and convulse with laughter; Fallenberg's wonderful bears will ride on high bicycles, skate and perform on the trapeze; there will be more clowns than ever before, and in the menagerie will be seen many new specimens of wild and untamed animals. There are a dozen of new baby animals in the great zoo.

BREA, ORANGE COUNTY, CALIFORNIA, FRIDAY, NOVEMBER 8, 1918

## INFLUENZA TAKES 2 FROM OIL FIELD

Influenza has taken two from this district during the past week Howard-Dunn of the Hole lease died at the home of his parents in Santa Ana last Saturday, where he and his family had gone when the disease first attacked him.

Dunn was a native of Ventura county and was 32 years old. He leaves a widow and four children. He had worked for the Union Oil Co. since July, 1917. The funeral and burial occurred at Santa Ana Monday.

Mrs. B. F. Ries died at her home on the Stearns lease Sunday morning, after a week's illness with influenza. It is said that she contracted the disease while attending others of her neighbors who were suffering from the malady.

Mrs. Ries was 47 years old and leaves her husband and ten children, five of whom are at home. One daughter is married and a son is serving with the American army in France.

Funeral services were conducted at McAulay's chapel, Fullerton, Wednesday afternoon and the remains were laid to rest in Loma Vista cemetery.

Aside from these two deaths influenza in Brea and this immediate vicinity is speedily on the wane. All patients are improving and the report of no new cases has reached The Progress.

Influenza broke out quite seriously on the Murphy lease the latter part of last week, that district being free from the disease up to that time. It is said that in all there are about 65 of the Standard's employes down at present and there are a large number of these cases on the Murphy. The recreation hall there has been transformed into a hospital and as many of the cases as possible are being cared

## Schuppert Makes Discovery.

Baker Geo. Schuppert has made a discovery, he says, which explains beyond the smallest iota of doubt the cause of the dread influenza which is prevalent throughout the world today. Schuppert's discovery is that the disease is brought on by the corn meal flour which is being used as a substitute for wheat flour. He says that in the first place the corn is impure and that fermentation causes a solidification in the stomach and brings on fever and a poisoning of the system.

Mr. Schuppert says that he is experienced in chemistry and has made an analysis of the corn flour substitute, and he defies the world on contradiction of his claims.

Some listen to the Brea baker's argument with evident interest while others ridicule his theory.

## GREAT NEED YET FOR UNITED WAR WORK

Everything is ready for the campaign for funds for the United War Work which opens next Tuesday.

There must be no mistake made in believing that because hostilities have ceased that the need for the work which is being carried on by the seven organizations which are to spend this money is at an end. This work will be even more important now than during the fighting period. Military authorities estimate that it will take approximately two years to get our soldiers all back home and muster out the recruits to the army. During this period these soldiers must be properly cared for. They must be provided with the needs that they demand with proper books, entertainment and recreation. The strain of the tense days and months will bring reaction when relaxation comes. The mind will seek occupation and amusement and enter

## MORE BREA BOYS CALLED TO SERVICE

The call for entrainment of 32 men for Kelly Field San Antonio, Texas from this district has been changed from the five-day period beginning November 1 to the five-day period commencing November 11.

The call for the 11th also includes 82 for Kelly Field and 16 for Camp Lewis, Washington. This makes a total of 131 men.

The board has reported that it will be able to send the first thirty-two men on schedule time, but only 50 per cent of the other thirty-nine. It will be at least the first of December before the board will be in a position to fill the entire quota.

The following is the list of thirty-two men who are to be called to service during the five-day period commencing November 11:

Arthur J. Varian, Los Angeles, Geo. J. Winter, Berkeley, John P. Varnum, Fullerton; Howard F. Swaop, Brea; Carl A. Hartman, Santa Ana, R. D.; Martin D. Fickel, Montebello, Lou J. Wester, La Habra; George F. Tanner, Anaheim; Amos Cole, San Pedro; John W. Ferguson, Huntington Beach; Jas. G. Venice, Alfred E. Noaring, Garden Grove; Samuel A. Ferguson, Huntington Beach; William D. Jesse, Santa Ana, R. D.; Leonard Vlaschaoritt, Los Alamitos; Warren P. Mings, Ravenshoe; Everett A. Stockton, Wintersburg; Guy Sawyer, Los Angeles; Raymond E. Beena, Huntington Beach; Frank R. Dahn; Frederick P. Robins, Anaheim; Paul E. Blakemore, Brea; Gordon Jones, Fullerton; Charles W. Middleton, Buena Park; Jesse R. Gray, Anaheim; Lorraine E. Tarbox, Huntington Beach; Clarence Sistrunk, Anaheim; Edmon Adams, Fullerton; Henry Bleecker, Anaheim; William M. Cox, Fullerton; Earl W. Cox, Rock Ford, Colo.; John F. Clark, Fullerton.

Alternates for the above contingent have been selected and if not required to go in place of others at this time
