will not exceed \$5 per acre Recapitulation The La Blythe valley includes the Blythe lands, and the adjoining lands proposed to be developed by the La Blythe Land & Water Co. has a great future before it. The project for supplying it with water is perfectly feasible and practical. The intake, as I have outlined, will be perfectly safe, and with the help of a dredger as planned can be operated without interruption. By using the Olive lake as a settling basin, the danger of silting up the canals (which in one of the greatest drawbacks at Yuma and Imperial) is safely removed. The topography of the tract is as favorable as could be desired, making it possible to economically construct canals to cover the entire tract by gravity flow. The ditch system now in operation is sufficient for immediate needs, but

Ed Evans has returned from a hunting trip in the mountains. He got a 200 pound buck. R. L. Andrews and wife left for Guthrie, Okla., where they expect to remain. Mr. and Mrs. A. G. Smith and Miss Ella Frosch are spending a week at Catalina Island. Mr. and Mrs. John R. Perry have returned home from a week's outing at Laguna Beach. J. B. Cook of Tempe, Ariz., visited the factory Monday. He reports that the recent heavy winds and hail storm did them damage to the extent of about 1500 out there. will be by water. Parker, good building facilities should be made and a good road built from the river to the townsite. In conclusion will say that the

...last week. Mr. and Mrs. Geo. McCroby and son of Ontario were Sunday guests of Mr. and Mrs. Jim Bush. Mrs. Bush also enjoyed a several days' visit from her sister, Miss Mildred Lloyd, of Fullerton, last week. Mrs. A. M. Wright and two daughters of San Francisco and Mrs. F. H. Brink and children of Los Angeles are guests of Mrs. A. Yost. The Union Oil Co. boys have organized a ball team and played their first game Sunday with Citrus, winning with score 3 to 2. Mr. Yarbrough, cashier of State bank at Pomona, accompanied by his wife, father and mother, composed an outfit on route to Long Beach, that being stranded in the canyon on Saturday owing to a broken hub, and they were obliged to return home in another outfit. Mrs. H. Lee Thompson and children are on the Orange River, Pleasant and

LOS ANGELES, July 28.—The 1 of E. G. Nix in a box in science of agriculture, brought a sum of early ripe potatoes to the Los Angeles chamber of commerce, with complaint that he could not find the market for them in consequence their size. Four potatoes weighed nine pounds an average of 2 1/4 pounds each. The tubers is a fair sample of the work. In consequence of their size neighbors object to purchasing them. He was therefore compelled to them himself. Mr. Day stated that he understood that the climate and soil conditions in California were such that a potato could be raised with very little cost. He therefore thought that a better crop could be raised with a little less fertilization, irrigation and cultivation and be put to the production of more than the usual yield.

TOPICS OF THE TIMES. A CHOICE SELECTION OF INTERESTING ITEMS.

Comments and Criticisms Based Upon the Happenings of the Day—Historical and News Notes.

As girls grow older they think less of dolls and more of dollars.

That man who's always complaining must be awfully tiring to himself.

It is possible to lead any man to the front of knowledge, but it's impossible to make him stay.

It is a mean woman who will ask her inter-touring husband to pronounce one of those Serbian names.

What a happy world this would be if every man spoke as well of his live neighbors as he does of his dead ones!

I usually in a fishing party there is one man who persists in quoting Frank Walton about and often, and thus scares the fish away.

In the peasant huts of Europe, mothers are putting the babies to sleep by telling them that unless they are good somebody will make them kites.

When last heard from King Pete was still trying to think how the men who put him there might be punished in some way that would be satisfactorily all around.

A Salem, Mass., judge recently sentenced two umbrella parlors to two months' imprisonment. This is the same Salem that has been so often accused of burning witches.

Hawaii has a pressing labor problem on its hands. It is the question how to make people work in a climate which produces food in such abundance that they don't have to.

Every American politician must secretly thank his stars that he was not born in England, where office-holders are expected to resign when they are criticised by the public. With such sensitiveness to public opinion it would be difficult over here for the patriots who serve their country to amass even a moderate competence.

A business woman who has a large correspondence says that women are guilty of two capital sins. One is

to show of themselves and I feel that I have been broken in spirit. I have only been able to learn from a friend that he never got up in the morning and other things that I have read in New York for pointing out children's

publishing the stories. I am sure he had been living in a small miser's house supported wholly by his two daughters aged 11 and 5, who sold her

family. A 13-year-old boy is in the love of a girl. Now, broken hearted and distressed, the once rich man is

deprived separated from his children and charged with violating a city ordinance. It is a pathetic but striking rebuke to the lawless of wealthy

people who expect to maintain the law if they can only get rich they are

fixed for this world if not for the next. Usually, a man who loves money well enough to accumulate a big fortune

loves it well enough to cling to it. But not always in this case and many can

other testify. Money is a nice thing to have, but it is not a safe thing to invest one's life ambition upon or to pin all of one's hopes to.

While they are talking in Boston about the length of the college career, consider one thing. Why is it that

civilized man arrives at maturity so much later than the savage? An Atha

About is an independent hunter, and perhaps a married man, at 10. A

than sets up a spot of group life with other. Tablithas of his own age who

begins to be a King in the country is

beginning a civil and military life in his ninth or tenth year. Meanwhile, what

is happening to the civilized child? He is still a child. He is slowly gathering

up in himself the inherited experience of a long line of civilized ancestors. He

cannot arrive at maturity so early as the savage because he has so much

more to learn. The accumulated experience of his race cannot be acquired by him in the first decade of his life.

He is fortunate if he has acquired it, or any appreciable part of it, at the end of three decades. It is this "prolongation of infancy" that gave John

Fiske so much material for study and discussion. Without such a prolongation and Fiske, the human race on it

never have reached its present position. As the human heritage of civilization

becomes greater and greater the period which the human child must spend in assimilating this heritage will become

longer and longer, and further toward middle age. Listen, therefore, to President Harper at the convention of the

National Educational association when

Lonsdale bleached cambric, 36 inches wide, splendidly woven and finished, 15c quality, tomorrow, 9c.

**12 1-2c FLANNELETTES 7 1-2c**  
Superior quality twilled flannelettes in fancy Persian patterns—solids, stripes and floral designs. Ideal for waists, children's dresses, etc. Sale 7 1-2c.

THE REAL BARGAIN CENTER OF LOS ANGELES  
**The 5th Street Store**  
BROADWAY AT FIFTH ST

**LA HABRA**

Two transactions of more than usual interest are reported, the first being the sale of the ranch property of Carroll Proud of Whittier. The ranch was sold to Messrs. McPherson and Nordholt of Santa Monica, for a stated consideration of \$75,000. It is the largest sale reported here for many months, but the price paid is regarded as reasonable. The ranch, which is in La Habra, consists of ninety-five acres of fine land, sixty of which are in young walnut trees in prime condition. There is a block of valuable water stock in the La Habra Water company. The sale was made directly between the seller and the buyer.

W. H. Landreth has sold nine acres of his home place to an outside party for \$1200 per acre. The property is set to oranges and walnuts and the house and lot go to the new purchaser. Only a few years ago good unimproved land sold in this valley at less than \$100 per acre. Mr. Landreth has commenced a new residence on his other 20 acres.

The Pacific Electric now has the poles placed from Los Nietos to the Leffingwell place on the new La Habra valley line. The track has been put down to a point one and one-half miles east of the Fullerton road. The road was to have been built on to Randolph but a woman land-owner refuses to give a right of way, which will delay the extension for a few weeks. H. E. Huntington and other officials were

here Monday looking over the new road.

Mr. Leonard of Santa Ana, who has been visiting H. M. Little, has returned home.

Mrs. Beach of Los Angeles was a guest the past week with her friend, Mrs. Tharp.

F. B. Drake of Wisconsin is visiting his mother, Mrs. E. M. Theophyllus and his sister, Mrs. F. W. Bishop.

Alta Proud has been sick the past week, but at this writing is much better.

The Woman's Mutual Improvement club will meet Thursday, Oct. 8th, at the home of Mrs. J. Luehm.

Ned Bishop and Harry Aldrich were home over Sunday from their schools in Los Angeles and Pasadena.

Mr. Selma, a young man from Morocco, who is studying at the University of California, gave a fine lecture at the church Sunday eve. He is a very pleasing and entertaining talker.

The officials of the Pacific Electric came out on the new line on a special car Saturday about noon. It is expected that cars will begin to run soon.

The B. A. C. gave a chicken bake at the home of Chas. Wester Saturday. The young people report a jolly good time.

The Farmers' club will meet Saturday evening, Oct. 10, at the home of Mr. and Mrs. France.

Mrs. Wm. Tharp spent Saturday and Sunday in Los Angeles visiting friends.

Mrs. D. A. Davis and Miss Wanda visited at the home of Mr. and Mrs.

Boroughs in Fullerton Sunday. P. B. Aldrich was a Santa Ana visitor Saturday.

**CARNIVAL OF PRODUCTS OFFERS VALUABLE PRIZES**

To Exhibitors—The parade of products committee offers the following prizes for stock to be exhibited in the products parade the first day of the carnival, Oct. 15. All stock competing must be led by the halter, and entries must be made by Tuesday night, Oct. 13th. There will be no entrance fee. Stock must be owned in Orange county.

For best draft stallion with five or more of his get, silver cup.

For best draft brood mare, with two or more of her foals, silver cup.

For best yearling colt or filly, draft stock, silver cup.

For best suckling colt or filly, draft stock, silver cup.

For best trotting or pacing stallion, with five or more of his get, silver cup.

For best trotting or pacing brood mare, with two or more of her foals, silver cup.

For best yearling colt or filly, trotting or pacing stock, silver cup.

For best suckling colt or filly, trotting or pacing stock, silver cup.

Suckling or yearling colts or fillies may be entered as such and may also be entered as get of stallion, or foals of brood mare, or in both the latter

cases. Also a colt or filly entering for an individual prize entered as get of stallion, brood mare.

In making entries, give check entered, classes in which same to compete, and name.

Cups will be on exhibit at Smith's jewelry store, 105 E. Street, Santa Ana, and exhibition can be obtained from entries made with the secret products committee, 111-113 West Fourth Street, Santa Ana.

**WATER COME**

Regular meeting of directors Anaheim Union Water company, October 3.

A request of lease for six months was presented Loftus and covering the Leffingwell site. The said request referred to president and authority to sign if satisfactory.

A request from W. E. the privilege of purchase of cement was granted. On motion the wages at the Yorba reservoir to \$50 per month.

A communication from changed that a ditch, accented and straightened to do the work. Ref

- Oration, "The Ride of Jennie McNeal"
- Miss ETHEL LOVERING.
- Male Quartette, "The Hunter's Call"
- MESSRS. RICH, CARPENTER, WEST AND HEMPHILL.
- Presentation of prizes... Wm. Starbuck

### Discovered by a Woman.

Another great discovery has been made and that too by a lady in this country. "Disease fastened its clutches upon her and for seven years she withstood its severest tests, but her vital organs were undermined and death seemed imminent. For three months she coughed incessantly, and could not sleep. She finally discovered a way to recovery, by purchasing of us a bottle Dr. King's new discovery for consumption, and was so much relieved on taking first dose, that she slept all night; and with two bottles has been absolutely cured. Her name is Mrs. Luther Lutz." Thus writes W. O. Hamnick & Co., of Shelby, N. C. Trial bottles free at Gem Pharmacy. Regular size 50c. and \$1. Every bottle guaranteed.

...and a great body of damp land that need  
no irrigation. Already many beautiful  
houses and flower gardens, windmills  
and pumping plants dot the valley.

A considerable acreage is planted to  
pears, corn, potatoes, tomatoes, etc.  
The raising of potatoes is quite profit-  
able. Parker Killgore is selling new po-  
tatoes at 3 cents a pound and will make  
\$100 per acre.

A prominent land owner from Full-  
erton recently exclaimed, "La Habra had  
bottom land on its mountain sides." Judging from the way this beautiful val-  
ley is forging ahead in a couple of years  
more it should raise 1000 carloads of  
fruits, nuts, grain, hay, wool and honey.  
A railroad through the valley is a cer-  
tainty in the near future.

The results already achieved in this  
wonderful section of Orange county are  
due to the foresight, prodigious energy  
and enterprise of W. J. Hole. He first  
came for his wife's health. Mr. Hole  
has set the example others have follow-  
ed. He has spent thousands of dollars  
in a costly brick residence and other im-  
provements. His orchards of oranges,  
lemons, grape fruit, apricots, etc., are  
truly magnificent. He has a private  
pumping plant with more than a mile  
of main pipe of large size.

Others have come for their health and  
found soil, climate and water unsur-  
passed. The result is a happy and su-  
perior community and a very desirable  
population. A fine two-story school  
house has been erected. There is also  
a store, lumber yard, daily mail, and  
telephone service. There are many  
happy homes adorned with shrubbery  
and flower gardens. Considering that  
the settlement is only four years old the  
progress made is indeed remarkable.

While in the valley the Tribune man  
examined the soil in a number of places  
and found that it was as moist as if it  
had been recently irrigated.  
W. J. Hole will gladly furnish infor-  
mation of this Gem Valley of Northern  
Orange county, so highly favored by na-  
ture.

H. M. Little is sinking a new well. It  
is down 40 feet, and five feet in gravel.

New potatoes and green peas are in  
the market. Potatoes at 3 cents a  
pound make La Habra farmers smile.

As a result of the good hay crop in La  
Habra mowing machines are in de-  
mand. Several new ones have been  
sold, and the blacksmith has been kept  
busy repairing old machinery. This  
year the hay and fruit crop will put a  
large amount of money in circulation.

The highway passing from the Lan-  
dreth to the Cusick place and in front  
of W. J. Hole's home place has been  
made a county road and will soon be  
improved.

The families of Mr. Leuhn and Mr.  
Lanner visited in Covina this week.

C. W. Gould of this place and C. H.  
Smith of Fullerton have been awarded

...back part of the store,  
City. These additions are very accept-  
able to the public. The spirit of enter-  
prise is apparent in Yorba.

At Yorba there is a well with water  
having a strong odor of sulphur.

J. Berlin Jr. has been busy this week  
helping to put in a new division gate  
above Yorba.

J. De La Guerra who has been sick is  
getting better again.

The Sanchez brothers have a fine al-  
falfa ranch and plenty of water. They  
find alfalfa raising is very profitable in  
dry years.

The rich bottom lands around Yorba  
with the oldest and best water right are  
attracting attention. They are admir-  
ably adapted to the growth of alfalfa,  
vines and trees. For two years these  
rich well watered lands have been very  
profitable. At present the crop pros-  
pects for vines, apricots, walnuts, olives,  
oranges, etc., are very encouraging.

Mr. Rommel of Los Angeles is getting  
along well boring for oil in the hills  
three miles west of the store. The well  
is down several hundred feet and the in-  
dications for oil are good.

Mr. De La Guerra expects a fair crop  
of walnuts of extra size and quality.  
His olive trees are full of blossoms. The  
old olive trees at Yorba should bear  
heavily. In other localities it has been  
observed that olive trees planted in  
adobe soil will not yield well this year.

In his 25 acre vineyard Mr. Bayha  
looks for the largest crop he has had.  
The vines are all laden with bunches of  
tiny grapes. Vineyardists expect a  
large yield of grapes.

The horticulturists all feel confident  
of a large crop of apricots. The fruit  
will bring a good price, and will be very  
profitable as prices are high.

Mrs. Geo. Bayha came out from Los  
Angeles to spend a few days at her  
country home in Yorba. The place has  
been put in order and the house and  
flower garden are now quite pretty.

It does not seem possible that land  
owners at Yorba with the finest soil and  
water for irrigation can have any reason  
to complain. The dry farmers of course  
are to be pitied.

Catarrh cannot be cured with local  
applications, as they cannot reach the  
seat of the disease. Catarrh is a blood  
or constitutional disease, and in order  
to cure it you must take internal reme-  
dies. Hall's Catarrh Cure is taken inter-  
nally, and acts directly on the  
blood and mucous surfaces. Hall's  
Catarrh Cure is not a quack medi-  
cine. It was prescribed by one of the  
best physicians in this country for  
years, and is a regular prescription.  
It is composed of the best tonics  
known, combined with the best blood  
purifiers, acting directly on the mu-  
cous surfaces. The perfect combina-  
tion of the two ingredients is what  
produces such wonderful results in  
curing catarrh. Send for testimonials,  
free. F. J. Cheney & Co., Props., To-  
ledo, O. Sold by druggists, price 75c.  
Hall's family pills are the best.

of baseball will be played

Look up Mr. Collis' spring and summer offerings on first page. He is reliable, honest and square and will give you a dollar's worth of goods for 100 cents.

Orange shipments this week from this point were as follows: Earl Co. 1, Chapman 1, Browning 2, Strain 2, Association 1, total carloads to date 273. The Earl Fruit company also shipped 4 carloads of cabbages, and 5 carloads of wool were shipped from the sheep ranches up in the hills.

Edward Kraemer has returned from a trip through Riverside county. While there he visited Strawberry valley, a celebrated mountain resort. He says the grain fields of the San Jacinto valley are looking well and that there will be a good hay crop at Morena, Hemet, Murietta and Temecula.

Connecting Fullerton by telephone with La Habra valley was a splendid stroke of enterprise, that should pay well. The principal ranchers have telephones in their houses and find it a great convenience to be able to communicate with our business men. The merchants have found La Habra trade is worth looking after.

Stern & Goodman have bought the one-story building, occupied by a part of their department store, from H. G. Wilshire. They also bought the 50 foot lot south of the building. The price paid is said to be \$6000. This is a valuable piece of property. Messrs. Stern & Goodman will probably build on the vacant lot in the near future.

A reception was given at the beautiful home of Mrs. Gus Hansen on Wednesday afternoon of last week. The house was handsomely decorated. The guests report having spent a very pleasant time. Those present were Mrs. P. Weisel, Mrs. C. Heiman, Mrs. C. Woelke, Mrs. F. Conrad, Mrs. F. Hiltcher, Mrs. J. Woelke, Mrs. J. Strodthoff, Mrs. G. Standolph, Miss Flora Weisel, Miss M. Horteman and Misses Selma and Clara Hansen.

The urgent necessity for cementing every foot of irrigating ditches and distributing ditches is now very apparent. The many miles of cement ditches already constructed are saving water every day worth during each year thousands of dollars to the land owners. Every additional mile cemented saves more water and renders it possible either to irrigate more land, or to give a larger amount of water to land already irrigated. The residents of Fullerton should be greatly interested in having the whole system cemented from the point on the Santa Ana river where the water is diverted down past Yorba, through the Olinda ranch and Placentia to Fullerton and Orangethorpe. The large amount of water saved in this way would be worth a great deal of money. More land will be made productive and winning wealth and population and add to the business of Fullerton. Water is too valuable to be wasted. The time has come in Southern California when it is much cheaper to save water running to waste than to develop an ad-

## LA HABRA.

Last Saturday a representative of the Tribune visited the far famed La Habra valley, adjoining Fullerton on the north and extending west into Los Angeles county. The fine condition of the barley fields, as compared with other parts of Southern California is very surprising. It is safe to say this lovely valley will produce the finest crop of barley hay in Orange county. It is wonderful to see the fine hay crop on the higher lands on the north side of the valley, even far up on the mountain sides. Mrs. Sansinena and Mr. Cusick on this high land have some barley much better than the average. It should be remembered that the barley fields of La Habra are not irrigated.

Landowners who pass through this picturesque valley from other sections, are amazed at the hay crop and the excellent condition of the orchards, in a year like the present; while the residents who have occasion to go elsewhere return home delighted to think that they were so fortunate as to purchase land and establish homes in a section of Southern California having so superb a climate, pure water and deep soil remarkable for its fertility. The recent settlers say if La Habra can achieve such distinction in years of drouth, there can be no doubt of its enormous crops of fruits, nuts and grain when the valley receives its average rain fall. There are several hundred acres in walnuts, oranges, lemons, apricots, peaches, olives, etc. The young orchards are beginning to bear. The quality of the fruit is very fine. Aldrich & Son find their tomato vines uninjured by frost the entire year. When orchards are properly cared for, there is still abundant moisture close to the surface. The soil is a rich black loam very productive and retains moisture remarkably well. In many places there is a natural sub-irrigation in the mountains, or can be secured by pumping. The valley is underlaid with an inexhaustible supply. There is some of the famous peat land and a great body of damp land that need no irrigation. Already many beautiful houses and flower gardens, windmills and pumping plants dot the valley.

A considerable acreage is planted to pears, corn, potatoes, tomatoes, etc. The raising of potatoes is quite profitable. Parker Killgore is selling new potatoes at 3 cents a pound and will make \$100 per acre.

A prominent land owner from Fullerton recently exclaimed, "La Habra had bottom land on its mountain sides." Judging from the way this beautiful valley is forging ahead in a couple of years more it should raise 1000 carloads of fruits, nuts, grain, hay, wool and honey. A railroad through the valley is a certainty in the near future.

The results already achieved in this wonderful section of Orange county are due to the foresight, prodigious energy and enterprise of W. J. Hole. He first came for his wife's health. Mr. Hole has set the example others have followed. He has spent thousands of dollars in a costly brick residence and other im-

the contract to build the new Frits residence, which will cost about \$1500. Work will begin at once. Mr. Frits will also spend \$500 in the erection of out-buildings.

Mrs. Helen Milligan of Mass. has bought 10 acres of land here from W. J. Hole, consideration \$80 per acre. She will improve the property.

A representative of the Fullerton Tribune was here Saturday taking views for the illustrated edition to be issued soon.

Mr. Leuhm has ten acres of the finest two year old fruit trees in the valley.

Sheepshearing is over on the Sansinena sheep ranch. The clip foots up about 30,000 pounds which will be shipped to San Francisco.

Mr. Fogg, a new arrival here, is visiting with Mr. Little and family.

Mr. Aldrich and Mr. Morland delivered a large quantity of green peas to the Whittier cannery this week.

Frank Millhouse is cutting his large crop of barley.

Four men were here Friday from Los Angeles county looking over the valley with Mr. Hole. They will probably buy land and locate in La Habra.

Miss Toler, who is visiting friends in Tennessee, will return home next month.

Mr. Coy, our enterprising merchant, reports business good. He sells everything in his line just as cheaply as they can be bought in Orange county or Los Angeles.

The valley roads are now in good condition.

## YORBA.

CORRESPONDENCE OF THE TRIBUNE.  
Mr. Carrizosa, the well known Yorba merchant, has made improvements in the post office. He has erected a fine cabinet in the back part of the store, and imported lock boxes from Kansas City. These additions are very acceptable to the public. The spirit of enterprise is apparent in Yorba.

At Yorba there is a well with water having a strong odor of sulphur.

J. Berlin Jr. has been busy this week helping to put in a new division gate above Yorba.

J. De La Guerra who has been sick is getting better again.

The Sanchez brothers have a fine alfalfa ranch and plenty of water. They find alfalfa raising is very profitable in dry years.

The rich bottom lands, around Yorba with the oldest and best water right are attracting attention. They are admirably adapted to the growth of alfalfa, vines and trees. For two years these rich well watered lands have been very profitable. At present the crop prospects for vines, apricots, walnuts, olives, oranges, etc., are very encouraging.

Mr. Rommel of Los Angeles is getting along well boring for oil in the hills three miles west of the store. The well

The marriage of Mr. Roberts united him with Ella B. Stroka, a native of Austria, and two sons have blessed their union: Theodore, Jr., and Joseph, both natives of Anaheim. Fraternaly, Mr. Roberts is a member of the Knights of Pythias, and in business circles he is a member of the Anaheim Chamber of Commerce. He is also interested in horticulture, owning an orange grove in the Placentia district, while professionally he is a member of the Retail Jewelers Association of California and the State Association of Optometrists.

**C. E. UTT.**—A man of much enterprise and force of character, a native son and the son of a '49er, is C. E. Utt, the president of the First National Bank of Tustin, who for the long period of forty-six years has been identified with this place. His father, Lysander Utt, was a native of Virginia, of Dutch ancestry, and he came here with the early gold seekers of the Argonaut days. While in the gold-mining country he met and married Miss Arvilla Platt, a native of New York who had come to California with her parents when a girl. Lysander Utt crossed the Santa Fe trail a number of times before the Mexican War and made and lost several fortunes. In 1874 he brought his family to Tustin, driving overland all the way from Placer County. The Southern Pacific Railroad was then just being constructed to Los Angeles, which was a town of about 8,000 people. Santa Ana was a hamlet of perhaps a dozen houses, while a little cluster of half a dozen cottages constituted the present town of Tustin. It was at that time still a cattle and sheep country, agriculture being yet in its infancy, as not more than two per cent of the county had even been plowed. Here Lysander Utt engaged in the merchandise business, buying the stock of H. H. Dickerman, who had started the first store in Tustin two years before, and died.

C. E. Utt was the only child of his parents and was but eight years old when the family came to Tustin. They made their home in the store building and he naturally grew up with the business from his childhood, and when he was twenty-one years of age he took charge of the store. From that time until 1893, he continued in the general merchandise business, giving it up at that time to engage in ranching, and this he has pursued ever since with great success. With the exception of sugar beets, he has grown practically every crop known to Orange County.

Mr. Utt was one of the organizers of the San Joaquin Fruit Company, and has been its president since its inception. This company owns 1,000 acres of land adjacent to Tustin, set out to Valencia oranges, lemons and walnuts, and now produces several hundred carloads of fruit and nuts every year. There are three packing houses on the ranch and a spur from the Santa Fe tracks runs up to their packing houses in the middle of the ranch.

In 1894 Mr. Utt was united in marriage with Miss Mary M. Sheldon of Tustin, the daughter of an old pioneer family. Mrs. Utt passed away in 1918, leaving five children: Mrs. Gertrude Hess of Victorville; Mrs. Dorothy Robertson of Los Mochis, Mexico; James B. of Tustin; Louise and Elizabeth. The family attend the Presbyterian Church and politically Mr. Utt was a strong Prohibitionist; since the passage of the Eighteenth Amendment he affiliates with the Republican party. In addition to his duties as president of the First National Bank of Tustin he is also treasurer of the Haven Seed Company. A self-made man, he has won his success by hard work and good management and he enjoys the confidence and good will of the whole community.

**WILLIAM G. KOTHE.**—One of the most enterprising horticulturists of the district in which his orchard is situated is William G. Kothe, whose well-cultivated orange grove of eight acres is devoted exclusively to Valencias. He has been a resident of Orange County for over twenty years, and to him there is no other section of the Golden State he finds so well adapted for citrus culture. Like many another, he began at the bottom of the ladder; but by hard work of untiring brain and muscle, he has won his way to a favorable place in the horticultural world.

Mr. Kothe is a native of Hanover, Germany, where he was born on August 2, 1877, and his parents were William and Sophie Kothe, also natives of Hanover. There were three children in the family, and they all came to reside in the West. Mary, Mrs. Riggers, is in Idaho; Annie, Mrs. Hiestermann, in Kansas, and William G., our subject, is the eldest of the family. The father died in Germany in 1883, and in time Mrs. Kothe remarried to Henry Ohlde, and three children were born of her second marriage.

In 1885 the entire family migrated to the United States, and settled in Washington County, Kans. William was then seven years of age, and he was reared and educated in, as the Kansans say, the "Garden of the West." Then, until 1900, he followed farming.

At the beginning of the century, he migrated to Orange County, Cal., and began his experience in orchard work. In 1904 he made a trip back to his old Kansas home and while there wed Miss Minnie Heitman who had come to Kansas to visit her brother, the acquaintance resulting in their marriage at Washington, Kans., May 25,
